

WASTEWATER COLLECTION SERVICE RATES

The system for computing each customer's monthly service charge is known as the "winter base rate system," based on actual water consumption for the three (3) individual months as reflected in the water meter readings of:

(1) December 10 through January 9

(2) January 10 through February 9

(3) February 10 through March 9

The average of the monthly service charges in these three (3) months, based on the customer's actual water consumption, will be the monthly service charge rendered to the customer by the city in each of the remaining nine (9) months of the year, meter readings March 10 through December 9.

Customers new to the city's system and who have no previous December through February consumption record will be charged an amount equal to the average service charge for all customers of the city's system, until such time the customer establishes actual consumption data for the "winter base rate" months as outlined above.

Customers classified as "commercial" must select, in writing and prior to March 31 of each year, between the "winter base rate system" and actual monthly wastewater service charges for the remainder of the year. Once a decision has been made by the commercial customer, it cannot be changed prior to March 31 of the following year. The absence of a written selection by the commercial customer will result in its charge being computed using the "winter base rate system."

Monthly Service Charge

The schedule to be utilized for the computation of monthly charges for wastewater service is as follows:

Each residential or commercial customer of the city's system whether inside or outside the city, must pay such customer's proportionate share of the costs for operation and maintenance of the system.

In addition, each customer of the city's wastewater collection system must pay an amount to share the costs of debt service and to provide for special reserve funds. The operation and maintenance, debt service, and special reserve funds are to be paid on a monthly basis as follows:

Rates for the first 15,000,000 gallons/month	Inside City			Outside City		
	Base	+	Per 1,000 Gallons	Base	+	Per 1,000 Gallons
Operation and maintenance	\$8.19		\$2.28	\$9.19		\$2.32
Debt Service	2.53		0.62	5.06		1.24
Monthly Charges	\$10.72		\$2.90	\$14.25		\$3.56

Rates for additional usage	Inside City Per 1,000/Gallons	Outside City Per 1,000/Gallons
Operation and maintenance	\$1.81	\$1.81
Debt Service	0.59	0.59
Monthly Charges	\$2.40	\$2.40

(1) All charges for wastewater service are made in one-hundred-gallon increments.

(2) Six (6) months following the date of availability of wastewater service, or at such time as a customer actually connects to the city's wastewater system, whichever event occurs first, the wastewater service charges as set forth will be due and payable.

(3) Customers who have service available but who have not connected to the system will be charged the minimum base monthly service rate.
